# VENKATA PAVAN KUMAR REDDY LOKASANI

B.Tech AI&DS Student | AI & Full Stack Development | Innovation-driven Technologist
l.pavanreddy9989@gmail.com | +91 8309627779 | Vijayawada, India
linkedin.com/in/venkata-pavan-kumar-reddy

## About

B.Tech Artificial Intelligence and Data Science student with foundational knowledge of Python, Java, JavaScript, HTML5, CSS3, Data Structures and Algorithms, Object-Oriented Programming, and software development. Experienced in applying programming and problem-solving skills through academic and personal projects. Strong interest in front-end development, scripting, debugging, and building practical software solutions. Adaptable and eager to learn new technologies while contributing to collaborative software development teams.

## Education

**K L E F Deemed To Be University** – B.Tech Artificial Intelligence and Data Science 2025 – 2029
GPA: 8.9 / 10 Vijayawada, India

**Dvsa Arka Institutions** – Class XII 2023 – 2025
GPA: 8.3 / 10 Guntur, India

## Skills

**Programming Languages:** Python, Java, JavaScript, C/C++
**Web Technologies:** HTML5, CSS3, JavaScript, Front-End Development, Responsive Web Design
**Core Computer Science:** Data Structures & Algorithms, Object-Oriented Programming (OOP), Programming Fundamentals, Problem Solving, Debugging, Complexity Analysis
**OOP Concepts:** Classes & Objects, Encapsulation, Inheritance, Polymorphism, Abstraction
**Tools & Technologies:** Git, GitHub, VS Code, Linux, JSON, REST APIs, SQL/MySQL
**Software Development:** Software Development, Scripting, Testing, Debugging, Version Control
**Soft Skills:** Leadership, Team Management, Collaboration, Problem Solving, Adaptability

## Projects

**FaceAttend** May 2026 – Present

- Developed a secure facial-recognition-based attendance system using FaceNet, OpenCV, TensorFlow, and Flask to enable real-time student identification and automated attendance capture.
- Implemented multi-layer authentication and anti-spoofing mechanisms to prevent proxy attendance and improve the reliability of identity verification through live camera feeds.
- Designed a real-time attendance processing pipeline for face detection, feature extraction, identity matching, and attendance recording in academic environments.
- Built an interactive React-based faculty dashboard for real-time attendance monitoring, student records, attendance analytics, and management of attendance data.
- Designed the system with a scalable cloud-based architecture to support secure processing, centralized attendance management, and reliable access for faculty and administrators.

**AaharExpress** Jan 2026 – Present

- Developed a full-stack food redistribution platform connecting donors, restaurants, NGOs, volunteers, delivery agents, and administrators to reduce food waste and support real-time meal redistribution.
- Built a role-based system with JWT-secured authentication, providing customized access and workflows for donors, restaurants, volunteers, NGOs, delivery agents, and administrators.
- Implemented real-time food ordering, donation management, surplus food listing, pickup coordination, and delivery workflows to streamline the redistribution process.
- Developed volunteer and NGO workflows for managing food pickups, validating food quality, and coordinating surplus food distribution to people in need.
- Integrated Google SMTP for automated email notifications related to registrations, orders, donations, pickups, and other important platform activities.
- Designed and deployed the application using React and Vite for the frontend, Spring Boot for backend services, and MySQL for secure and structured data management, with deployment on Vercel and Render.

## Certifications

MongoDB Node.js Developer | Linguaskill

## Languages

English (Proficient), Telugu (Native)
